What's new in this release

Webinars

Rearrange and delete custom questions in registration form

Webinar hosts can now rearrange or delete custom registration questions or do both after they have been saved in the **My Questions** section of the registration form.

Attendee reminder emails to include registration ID

Reminder emails sent to attendees before a webinar begins now include their Registration ID so that the attendees can easily join the webinar.

User Hub

Unified scheduler on site portal and User Hub

Schedule meetings with options tailored to your needs. Schedule to meet quickly, or set up a series of meetings with advanced options for your team.

For additional details, please see the help article: [Schedule a meeting from User Hub](#)

Control Hub

VoIP enhancement in Control Hub

We're changing the VoIP feature to be more user-centric. In the future, if the host is blocked from using VoIP, it won't affect the attendees. As long as attendees are individually allowed to use VoIP based on their organizational policies, they can freely access VoIP features during the meeting. This means that hosts restricted from using VoIP can now conduct meetings without worrying that their restrictions will limit the communication options available to their attendees.

Open bugs

See this table for open and resolved customer-found bugs for the latest versions of the Cisco Webex Meetings Suite. Resolved bug lists are in order starting with the most recent update.

Bug number	Severity	Affected product area	Description
CSCvh90269	3	Webex Meetings	The Make Screen blank feature doesn't work on Windows 10 devices if User Account Control is enabled.
CSCvi72293	3	Webex Meetings (Mac)	If a user's Facebook account is locked, they can't stream Webex meetings on Facebook Live.
CSCvh63085	3	Webex Webinars (Windows)	During webinars, when a presenter shares their screen, participants can see chat notifications that appear to the presenter.

Resolved bugs

Bug number	Severity	Affected product area	Description
CSCwj53522	3	Webex Meetings (Windows)	Fixed an issue where Connecting... message keeps showing.

Bug Search Tool

We report open and resolved customer-found bugs of severity 1 to 3. You can find details about listed bugs and search for other bugs by using the Cisco Bug Search Tool. For more info on using the Bug Search, see [Bug Search Tool Help](#).

Cisco has more than 200 offices worldwide. Addresses and phone numbers are listed on the Cisco website at www.cisco.com/go/offices.

The documentation set for this product strives to use bias-free language. For purposes of this documentation set, bias-free is defined as language that does not imply discrimination based on age, disability, gender, racial identity, ethnic identity, sexual orientation, socioeconomic status, and intersectionality. Exceptions may be present in the documentation due to language that is hardcoded in the user interfaces of the product software, language used based on standards documentation, or language that is used by a referenced third-party product.
